

Insight Report of WeRateDogs

Introduction

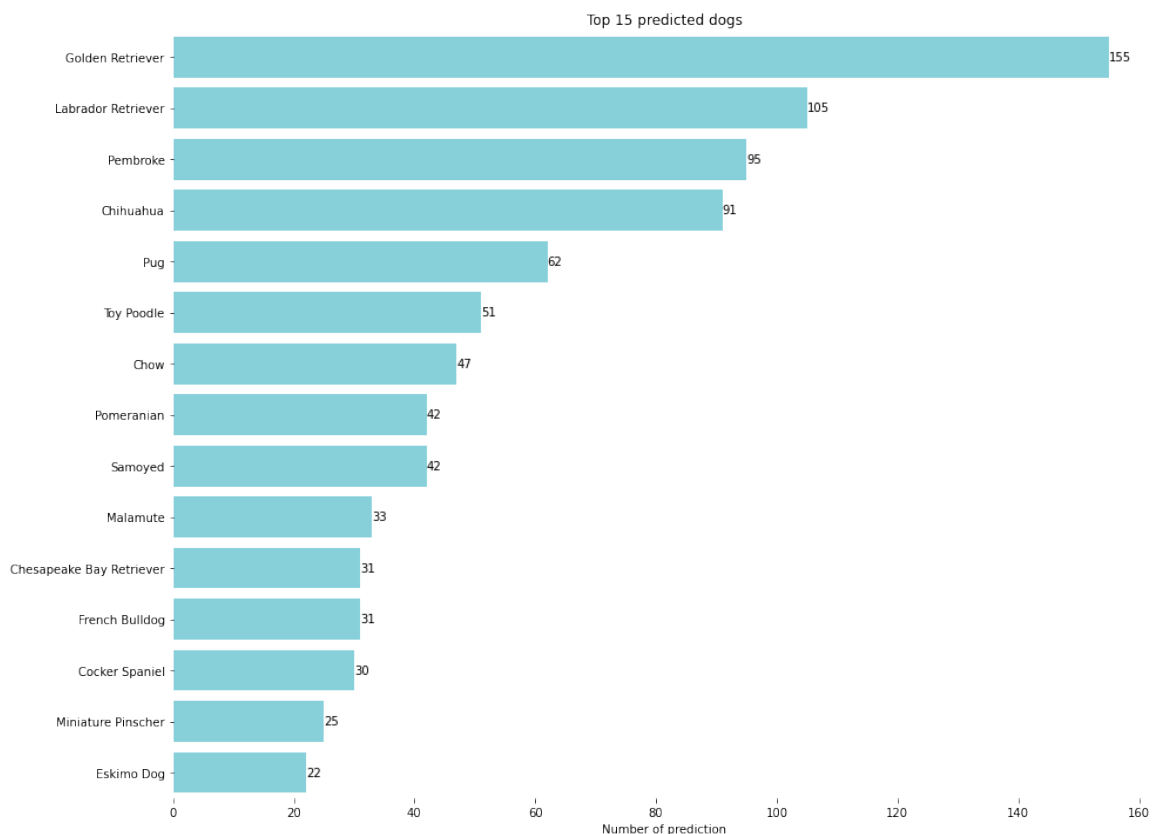

The purpose of this project is to put into practice what I've learned in Data wrangling data course which is part of Udacity Data Analysis Nanodegree program.

The dataset wrangles in this project is the tweet archive of Twitter user @dog_rates, also known as **WeRateDogs**. It rates people's dogs with a humorous comment about the dog. These ratings almost always have a denominator of 10. The numerators, though? Almost always greater than 10. (11/10, 12/10, 13/10).

After cleaning and merging all the dataframes we are able to analyze and viusalize 1500+

Top breeds rated by WeRateDogs

On analysis we found that **Golden Retrriver** is the most common breed rated by the WeRateDogs followed by **Labrador Retiver**, **Pembroke**, and **Chihuahua**.

Golden Retriever

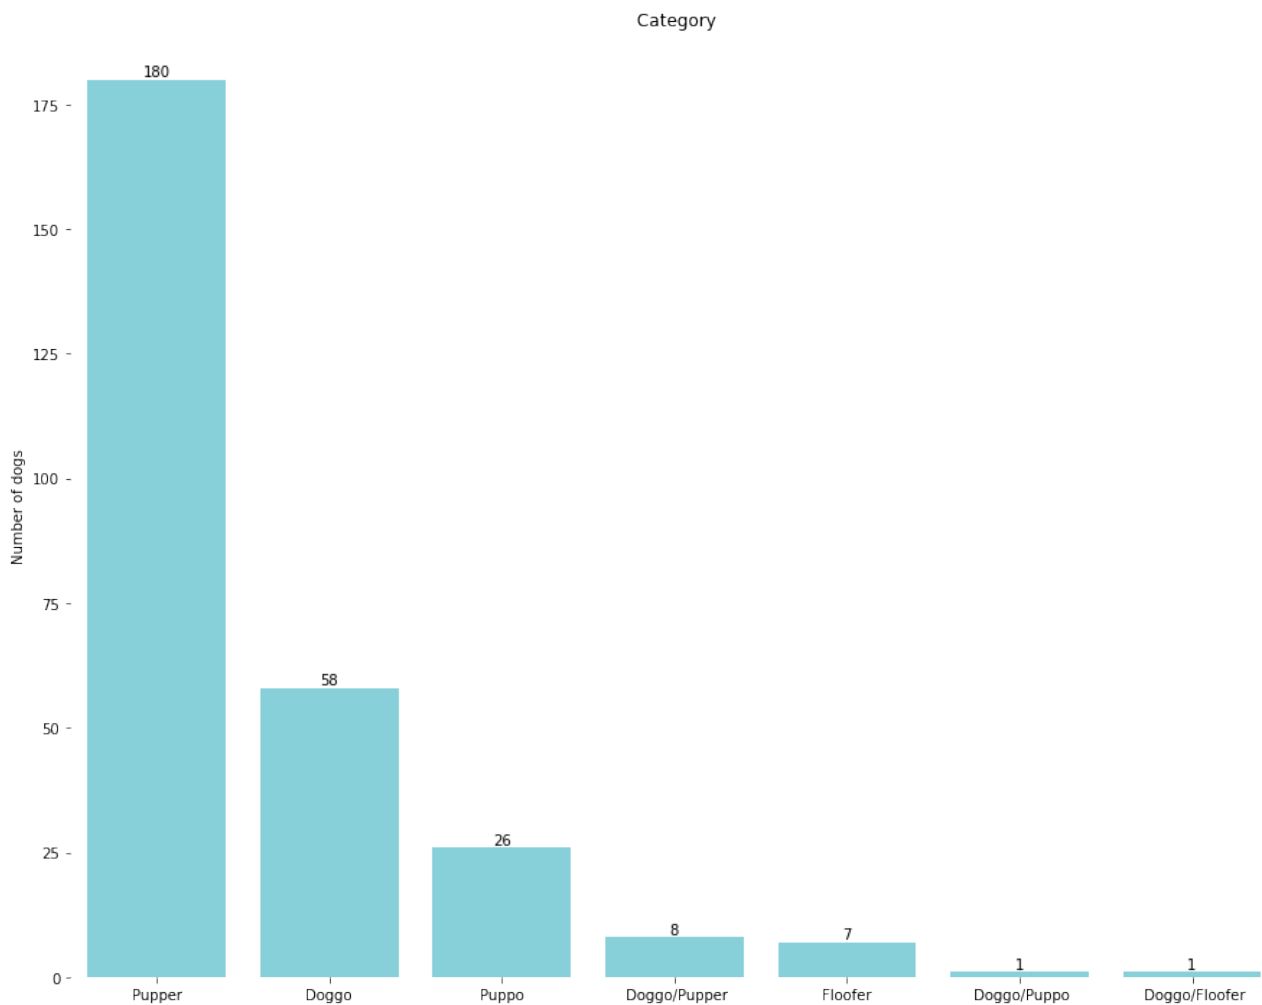

Labrador Retriever

Pembroke

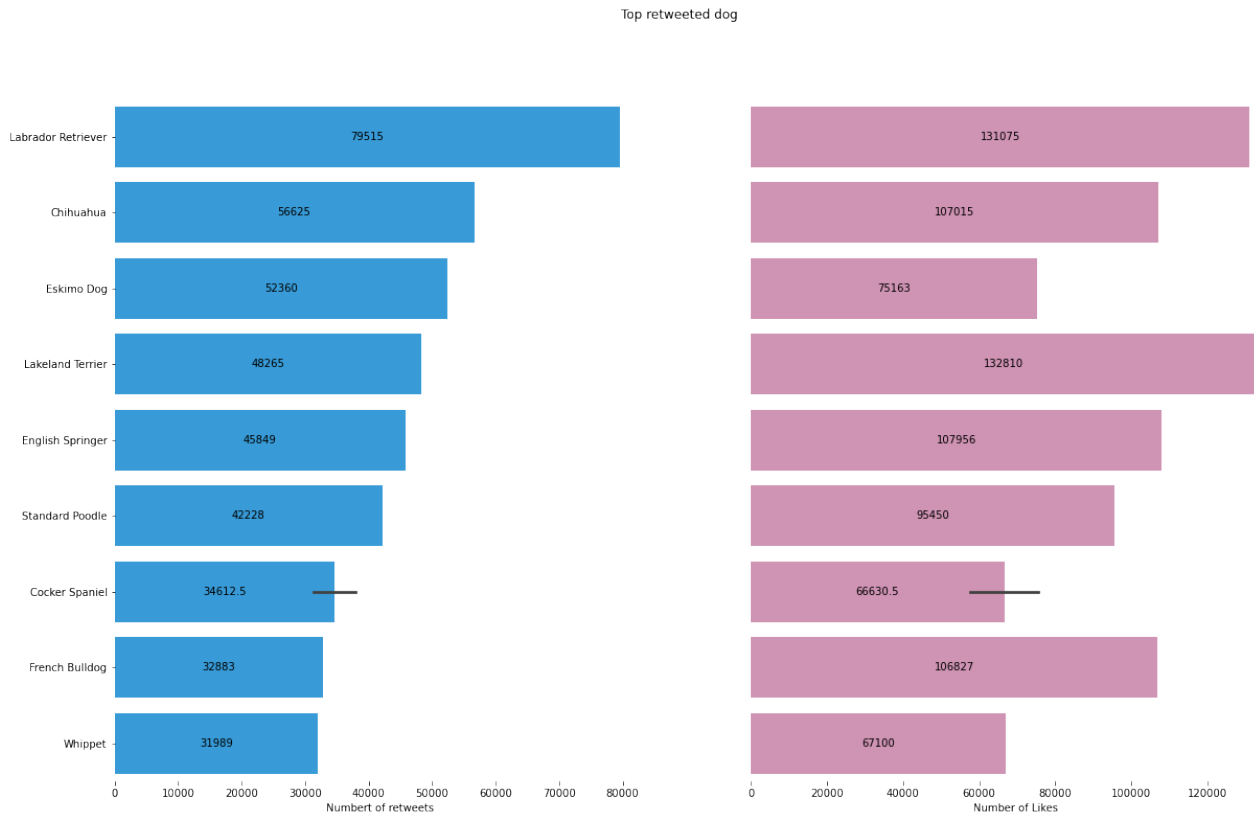

Most popular category

WeRateDogs classified dogs as Doggo, Pupper, Floofer and, Puppo. Most of the dogs rated by this twitter account comes under Pupper category.

Most retweeted dog and its like

The most retweeted dog was **Labrador Retriever** 79515 retweets and 131075 favourite by people.

Labrador Retriver

Chihuahua

Eskimo dog

Account Popularity

The page gained popularity over time as it is clear in the graph. There is an upward trend in the number of favorites which is an evidence of account is getting popular among the people.
